Hello everyone, Total War: SHOGUN 2. All Discussion Screenshots Artwork Broadcasts Video Workshop News Reviews Guide. I'm sure it's because I'm doing it on a Mac. Display 1-3 of 3 MarkyHELL comments. July 25, 2017 11:13 p.m. I haven't tried that mod yet, but, I've used fashion like Traditional Japanese Mod Music and Process I. Total War: SHOGUN 2, Free Download Feral Interactive. Sign in/ Sign up. Real-time game strategy for Mac. Skies of War. Action airplane is a combat game for mac. Gratuitous tank battles. It is a unique hybrid of tower defense, strategy, simulation and RTS. Because Mac operating systems differ from Windows in a number of ways (such as file structure and location, file extension, hotkeys, and so on), we offer the following summary of Mac-specific parts. In: Can I use fashion with a Mac? Answer: Yes, you can! More information is here. In: I want to change my preferences. Where can I find a script folder? A: The script folder can be found in: /library/creative-assembly/Rome2/scripts(to download Steam)/library/containers/com.sega.mac.rome2/Data/Library/The Creative Assembly/Rome2/scripts (to download the App Store) It can be hidden by default, like the Windows 'appdata' folder. To go to this folder, go to the Mac desktop, make sure Finder is selected, click the Go button on the Finder menu bar at the top of the screen, and then go to Folder. Enter the path just like the above (including the tilde symbol). In: Encyclopedia minimizes the game and opens a web browser. How do I view the encyclopedia in the game? A: This feature can be modified with the preferences.script file found in: /library/creative-assembly/Rome2/scripts(to download Steam)/library/containers/com.sega.mac.rome2/Data/Library/The Creative Assembly/Rome2/scripts (to download App Store)Open the file and search for the term external_browser true; Then change this to external_browser false; and re-save preferences.script file. The encyclopedia will now open in the game. The question: I set the quality of the game up to very high or higher, but not all the visual features show. Why is this so? A: This problem occurs when the GPU does not have enough graphics memory to make all the visual features of the game. This can include features such as shadows and anti-aliasing. A warning will appear while the screens are downloaded to notify you that the graphics will be downgraded. If so, the graphics settings will be customized to the user; You can then enter the graphics settings of the game, and change the different settings as you see fit. Note that if your Mac doesn't have more than 1GB of graphics memory, it's not advisable to play on higher settings with a resolution above 1920 x 1080. In: Are there any differences between the steam version of the Rome II for mac? Answer: Yes. Version Mac supports the multiplayer version, and all ROME II DLCs are available via Steam in the Steam Mac version. A: I just bought a game in the Apple App Store. How To Am I getting DLCs? A: Unfortunately, no, you can't. DLCs are not available through the App Store. Can I play online? A: Unfortunately, no, you can't. The multiplayer functionality has been removed from the App Store for development reasons. A: Can I play a multiplayer game with PC Player? A: Unfortunately, there is no cross-platform multiplayer functionality, although you can play with other Mac users (only the Steam version). In: Can I play on my old computer while saving on a Mac? A: Yes, PC saves and cross replays are compatible. You'll need to move them to the game's save folder located in: /library/Creative Assembly/Rome2/save_games (to download Steam) / library/containers/com.sega.mac.rome2/Data/Library/The Creative Assembly/Rome2/save_games (to download the app store) or sync the game with Steam Cloud (this happens automatically provided that your old saves are synchronized). B: Whenever I try to press the right mouse button with my Apple Magic Mouse rather than issue an order I deselect all units. Why is this so? A: The magic mouse can be very sensitive to the touch, and it's important to note what settings you've set up when using it. If you use the default settings, the mouse will register one finger as a left click and two fingers to the right of the Magic Mouse surface as the right click. We recommend ticking the secondary flick switch in the mouse screen settings (according to the Mouse Preference System) that will make your Magic Mouse act like a traditional 2-button. In: My game failed, how to find a report of error? A: If an app is cut, your Mac should automatically generate and display an error report. If this is ignored or not sent to Apple, it may be located in the next folder/library/magazines/diagnostic reports called Rome II Date. In: By default, the Mac hotkeys override ROME II hotkeys. How do I turn them off? A: To use F1-F12 keys as game commands, there are two options: 1) Pressing Fn and F1-F12 will bypass the functionality of Mac hotkey.2) Go to system preferences - the keyboard. Under this menu you will see a tick box labeled: Use all F1 F2, etc. keys as functional keys. This will allow you to switch hotkeys to standard F-number keys. To use the default Mac hotkey functionality, you can use Fn f1-F12. What are the minimum requirements for starting a game on a Mac? A: Minimum Requirements: Operating System: OS X 10.7.5 Processor: 1.7 GHz Intel Core i5 Ram: 4GB OF RAM Hard Drive: 25GB Video Cards: 512 MB AMD Radeon HD 4850, NVidia GeForce 640 or Intel HD 4000 Screen Resolution: 1024x768. Unsupported graphics chipsets for Mac: NVidia GeForce 9 series, GeForce 300 series, GeForce series AMD Radeon HD 4000 series, Radeon HD 2000 series: What are the recommended requirements for starting a game on a Mac? R: Recommended Requirements Operating System: OS X 10.7.5 (or later) Processor: 2nd Generation Intel Core i5 (or more) RAM: 8GB of RAM Drive: 25GB graphics card: 1GB NVidia 750 (or better) Screen resolution: 1920x1080. Unsupported graphics chipsets for Mac: NVidia GeForce 9 series, GeForce 300 series, GeForce quadro series, AMD Radeon HD 4000 series, Radeon HD 2000 SeriesIf you're having problems not described here, please let us know by posting a new stream for each release. (Please keep in mind that on these support forums this is one thread on the player in question because it helps us organize our support and how we can help you. The Total Shogun War 2 fall samurai is the latest version released in 2016 by Sega Gaming Company online pay. And in Total War shogun 2 fall samurai units is the second most viewed PC game and have some impressive graphics and visual PC Game The gameplay of Total War Shogun most likes PC games and now it has downloaded worldwide common shogun worldofpcgames.co war 1 PC download games for PC. Play online multiplayer games without keys to PC games. Stratagical PC game is a common shogun war 2 that is simmered in the era of empire PC games also including StrongHold Crusaders 2 HD Version Download.The game is based on a strategic PC game in which the player can play the game online as a multiplayer game. The game allows characters to play in different maps and can attach to their enemies, just like fortress PC games planning online on different straits. Playing online PC Game Total War Shogun Two. Total Ear Shogun 1 PC game Download for free. A new version and a series of updates for PCs. Total War Shogun two system requirements1 :: Windows to play :: Windows 7/8.1/10 (64-bit versions). 2 :: Processor: Intel Core 2 Duo -2.3 GH/AMD or better. 3 :: Ram :: 1GB of RAM. 4 :: Graphics:: No required for this game. 5 :: Space Storage:: 20GB space. Ok. Fortunately, Project M makes it pretty easy to add custom songs - mainly because it's already been done by PMBR. Now, all that's between you and the custom metal-dubstep-8bit-rap-trap-home-techno-remix music package of your dreams is just knowing how a few things work, your internet download speed, and your attention. Let's get started! So, first of all, you need to know where to put the files that you download. You just go through the next series of folders: pf - zgt; sound - zgt; strmAnd you're there! Ok... It was easy... This is, my friend, a bunch of BRSTM files. They contain music in a format that games like Mario Kart and SSBB can read. It's also something you'll use. There's also a list put there by PMBR that tells you it is the songs that are replaced by default. File names 1 letter and 2 numbers to tell the game exactly where the song/sound sound Go. More on that later... You download them. Here are the links to the 3 places where I got mine: brawlcustommusic.com (smashboards) brawl's custom music center (smashboards) BRSTM factory - for requestsALTERNATIVELY You can make them yourself: is a tool that will convert almost any type of audio file into BRSTM. I'm not quite sure how to use it myself because I'm on a Mac. (tried winebotter, doesn't work). I'm sure it's just a select file to type in, and filetype to infer, and then click the kind of thing, but I could be wrong... it's a good thing to know how many songs you can have on stage. There is no code that allows you to add song slots at different stages (although I wish there was :P), so you'll only be able to use the default number of songs for each stage. Here is a list of the number of songs for each stage: Tournament Legal:Battlefield: 5Final Destinations: 5Yoshi's Island: 51/2E02 and E07 are part of the Obstacle Course and Alternate throughout the matchLylat Cruise: 11Pokemon Stadium 2: 5Warioware: 817 counting the theme of microgames, but those go unusedDistant Planet: 9Smashville: 5'11 counting KK songs that play exclusively on SaturdaysSkyworld: 4Fountain o' Dreams: 5previously mario bros. Green Hill Area: 12Yoshi's Story: 2previously Yoshi's Island McGreeleen Green: 2 Occasionally Tournament Legal:Dracula Castle: 5-LuigiMetal Cave: 6Inprecious Mushroom KingdomNorfair: 6Pokemon Stadium: 3Halberd: 3Halberd12Other:Delfino Plaza: 5Peach's Castle: 7previously Mario CircuitRumble Falls: 7Hyrule Castle: 9Representably Bridge EldinPirate Ship: 8Frigate Orpheon: 6Saffaron City: 5Pree Pillar PillarPort Town Aero Drive 12Castle Siege: 12Fourside: 6Preive New Pig CitySummit: 5Congo Jungle: 3previously 75mFlat Area 2: 3Pictochar: 9Shadow Island Moses: 9Temple: 2Jungle Japes: 22Onett: 2Corneria: 2Rainbow Cruise: 2Big Blue: 2Brinstar: 2Other other:Menu: 4Subspace Emissary: Unused in PMVictory Topics: 20Other Sound Effects and Music: 26 You Won't Believe How Long It Took, To dial ... Now, all that's left to do is put BRSTMs in a folder and rename them according to this list. For example, if I wanted to replace Fountain of O'Dreams' Douchuumen (Nazo no Murasamejo) with the acidic notation of a gourmet race, I would place the BRSTM gourmet race in a folder and rename it No.14. I would recommend making a list of what songs have been replaced by that, especially if you either plan to re-edit songs that are already included or want to change the titles of the songs that appear... No, you can pop that SD card/USB back into the Wii and download it as you would normally would.certain.yes.GO AWAY! Slams the door Everything you need to know when adding a custom song package to your copy of the M.Ange project?... a few quick Google searches, some downloads, A few tests later ... So, if you want to use Brawlbox: THIS is a stream of smashboards for you! Ok. For those of you who Mac, use this link to be taken to stream in kitty-corps neow Mix forums that will tell you what you need to run it. (Here) is a winebotter installation tutorial if you need it.) If you have all the files you need, open the debauchery, click the Open button and go to where the SD card is. Then go through the project m zgt; pf and zgt; 2. when you get there, open info.pac.you now have to see the stuff appear in the brawlbox. Now open the archive and click on MSG MiscData140.Even more things should have appeared.you should see a list of all the names of the songs. To find the one you want to change, click on any song (the text box should appear below when you're doing it with) and click on the first letter of the default song name until you find it. Now just change it to the name you want. When you're done, save the file. This probably won't be a problem for the PM to have already cleared the file, but just to be safe: check info.pac in filesize. If it's over 391KB, the Wii will freeze. I'm not a psychologist or anything, but I don't think that's what you want. If it's more than that amount, look at the List of Wi-Fi messages in MiscData160's MSG. Replace every message you don't think you'll encounter?. This should clear up enough space that allows it to work properly. You've successfully edited the titles that appear in combat! Now for my music: Right click on and export MSG MiscData140 to a place where you'll remember to remove it as right in the middle of your desktop. This time, while you choose a file instead of info2, go to menu2. You should see a file called mu_menuin. Open this at brawlbox.click on MiscData7's MSG. You'll see the same list of songs as before. Now click MSG MiscData7 and click Replace. Select MiscData140. Mac users using winebotter, you can get a message asking if you want to save the changes before closing. Click undo. Click on MSG MiscData7 again, and make sure everything has been replaced normally. Now you can save the file. Now you have to be able to play without any problems! :D are free to leave any feedback or constructive criticism you may have in the comments, or send me a message. I'll get to him as soon as I can. Edit the list:move PS1/Halberd in the sometimes legal category.fixed grammar issue before topADDED TITLE EDITING TUTORIAL (something that actually worked the first time I tried it... Wu!) Page 2 2
